EnrollXP Services for Academics & Business

Issue : February – 2018 release v3.0

EnrollXP

(for Academics)

Smart **Enrollment eX**perience

Go **Paperless** with all Forms

- Create elegant smart forms of all kinds – applications, surveys, feedbacks, polls etc.
- Reduce data input inaccuracies, omissions and errors to almost nil using data validated and logic driven application forms
- Avoid laborious and time-consuming manual review of received forms data using easy-to-use data review/ filtering/ shortlisting tools
- Replicate your approval workflow into EnrollXP and manage forms processing and approvals online
- Reduce overheads by 90%. Process applications 10x faster than manual process. Eliminate printing, handling, postage and processing related costs
- Go paperless for most interactions with students, parents, staffs and vendors using EnrollXP. Efficient online collection and transparent handling for **all** kinds of forms. **Go Green.**

3-Step workflow process

- Design customized smart forms
- Publish on institutes website or send as e-mail /any messaging medium

- Applicant fills online forms and submits
- Get auto-notified on email. Institute staff(s) also gets per applicant or periodic status updates as configured

- Analyze, approve and process received forms using build-in workflow management tool
- Generate shortlists, reports, graphs, send data for further process etc.

Salient features

EnrollXP is *essentially* developed with an objective to make academic and other institutes go paperless and efficiently manage/analyze and process collected applications. Here are some unique features of this online service:

- Cloud hosted service. Any internet enabled device like desktop / laptop / tablet or a smartphone can be used to fill the online application and use the service
- Easy client access tool to analyse data, sort, filter, short-list and create reports. Export data to CSV/PDF/Excel format for further processing and loading into external systems. Create and publish management summary reports and graphs based on data
- Backend service is hosted on state-of-the-art cloud infrastructure and designed using scalable architecture. Can effortlessly handle peak submission loads.
- Highly secure system with SSL/PCI compliance, data encryption, two-factor authentication, DoS/DDoS protection etc.
